

Chie Hayashida

First name: Chie **Email address:** chie8842@gmail.com
Last name: Hayashida **Web:** <https://chie8842.github.io/aboutme/>

Profile

Software engineer with extensive knowledge of **DWH architectures**, **ML pipelines** and **infrastructure engineering**. Designed and Developed **many types of systems** which includes both BtoB and BtoC systems in **9+ years** of experience. Combines **technical skills**, **creativity** and **leadership** to empower the business from an engineering point of view. Has excellent **presentation skills** and self motivated enough to learn new technologies, **contribute to OSS** and **write technical articles**.

Work experience

Cookpad.Inc Tokyo Japan	Software Engineer • Leads the development of search and recommendation for Cookpad itself and new businesses in all processes of KPI formulation, policy planning, implementation and evaluation in terms of NLP and machine learning . • Develops tools to simplify machine learning deployment and maintenance . • Builds AutoML function using table data for recipe data normalization. • Makes technical presentations at several conferences and write technical articles for recruitment and awareness improvement.	11/2017 – present
Ubie.Inc Toyo Japan	Freelance Engineer • Built ChatOps System for Kubernetes deployment with Golang .	12/2018 – 01/2019
Retty.Inc Tokyo Japan	Data Engineer • Launched and led the data engineering team and solved problems of current DWH. • Built the basis of data utilization environment using Apache Spark , BigQuery , fluentd , kinesis , Airflow and embulk in a short period of time. • Led infrastructure configuration management in AWS and GCP environments using Terraform and Ansible .	03/2017 – 10/2017
NTT Data Corporation Tokyo Japan	Software Engineer • Designed and developed recommender algorithms and data processing for the TV program recommendation system using Hadoop and Spark (global system, 400+ nodes). • Conducted PoC of data processing for exhaustion prediction of car parts using sensor data. • Designed and implemented data transfer, backup and recovery procedures with a performance-oriented approach , in the BCP project of a huge and demanding mobile fee system. • Took charge of everything from network, OS to middleware design for system development in the US of a Japanese company. • Performed root cause analysis in response to a technical troubleshooting request for Hadoop and Spark from a customer with a support contract. • Did troubleshooting about Oracle Database in several projects. • Educated and mentored several engineers.	04/2010 – 04/2017

Education

Nara Institute of Science and Technology Nara Japan	MSc Engineering • Master thesis described Linear transformation approaches to many-to-one voice conversion . • We made 8+ presentations at domestic conferences and study groups.	04/2008 – 03/2010
--	--	--------------------------

Education

Osaka University
Osaka
Japan

BSc Engineering

- Learned about programming basics(C and C++), biotechnology, mathematical analysis, linear algebra, statistics, and mechanical engineering.
- Bachelor thesis described Measurement method of receptive field characteristics of primary visual cortex.

04/2004 – 03/2008

Skills

Hadoop

Spark

TensorFlow

Elasticsearch

Kubernetes

Solr

Distributed Computing

Big Data processing

Machine Learning

Recommender Systems

NLP

Analytics

Operating Systems(Unix, Windows)

Python

Scala

Golang

Java

C++

Cloud Computing

Oracle Database

Project Management

R&D

Leadership

Decision making

Languages

日本語

English

Certificates

AWS	AWS Solution Architect Associate	10/2018
IPA	Database Specialist Japanese IT Security Evaluation and Certification Scheme	04/2012
IPA	Network Specialist Japanese IT Security Evaluation and Certification Scheme	10/2012
IPA	Applied Information Technology Engineer Japanese IT Security Evaluation and Certification Scheme	04/2011

Achievements

- Won **1st prize** in micro service tuning contest at **AWS re:Invent2018 GameDay**
- Won 18th prize (**Top 1%**) in one week challenge at **Kaggle** PetFinder competition
- A contributor and reviewer of **TensorFlow document translation**.
- Develop and contributes some OSS includes **TensorFlow, Apache Spark** and so on.
- A (**co-**)**organizer** of several communities and meetups in Tokyo
- Performed speeches at PyConJP, PyData London, Docker Meetup and so on.
- Writing technical articles in Gihyo Magazines.

Hobbies

IoT, DIY, 3D
printing

Traveling

Tennis
